## Dog Poison Checklist

The following is a list of the **most common poisonous household items that are dangerous** to dogs.

- Use the list to check that your house, yard and shed is safe for your dog.
- Your dog should not be able to access any of these.
- Some such as snail and rat baits are very tasty and need to be kept in a locked cupboard.
- There may be other items not included here that are not poisonous, we have tried to include the common items we see. If you are not sure about a substance please consult us.

### Human Foods

- Grapes and sultanas
